

Pressing Tube Kit

The Pressing Tube Kit ensures proper locations of all wheel set components. Such precision is critical if regular and low-floor wheel sets are to perform up to specifications, as well as meet the high standards of the Association of American Railroads (AAR) and the International Union of Railways (UIC).

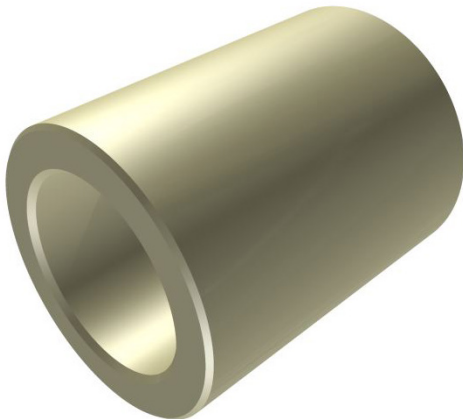

The Pressing Tube Kit also contains seat and axle end protectors. It's another way that Penn Machine helps to extend the wear life of our customers' axles and axle components.

Wheel Tube (Part #00706187)

Measuring Plate (Part #00706190)

Teflon®/Nylon® Bushing (Part #00706189)

Coupling Tube (Part #00706188)
