

RoboJack Resilient Wheel Tire Replacement Tool Kit

Rubber-cushioned wheels with detachable rings require replacement of worn-out tires and rubber blocks. Rubber blocks provide valuable shock absorption and noise reduction, and the RoboJack Tire Replacement Tool Kit makes tire replacement easy.

Rubber blocks must be kept free from petroleum-based products and stored and used at temperatures lower than 212°F (100°C).

Do not weld near the rubber blocks, as ozone produced by welding is detrimental to the rubber.
