

Penn Rubber Products for Rail Transit Applications

Penn Machine Company is a major supplier of high-quality rubber components to the rail transportation market. We are the exclusive North American rail transportation product distributor for LORD Corporation — a global leader in the development of high performance elastomers and the bonding of elastomers to metals.

Products for Vibration & Motion Control:

LORD Corporation has led the way in developing solutions to manage motion and minimize the noise, vibration and shock that often result in the rail transportation industry. Penn Machine will partner with you to research and design a solution that meets your specific needs, either by developing a new application or capitalizing on LORD Corporation's existing technologies. From vibration management systems to rubber-to-metal isolators and couplings, Penn Machine's goal is to improve the quality of your rail transportation operation.

PENN MACHINE COMPANY

Penn Rubber Products for Rail Transit Applications (continued)

Bushing, Mounts and Other Components:

- Metro Car Products
- Control Rod Bushing
- Drive Coupling Bushing
- Propulsion Motor Bushing
- Suspension Bushing and Link
- Third Rail Contact Torsion Bushing
- Traction Motor Link/Bushing
- Traction Rod Bushing
- Auxiliary Equipment Mounts
- Bolster Mounts
- Compressor Mounts
- Engine Mounts
- Low Frequency Engine Mounts
- Traction Motor Mounts
- Propulsion Motor Suspension
- Lateral Truck Bumper
- Driveline Couplings
- V-Spring – Chevron Springs
- Air Springs
- Snubbers
