

Engineering Services That Translate Your Requirements Into Long-Lasting Products

Whether you're in mass transit, freight & commuter rail, heavy manufacturing or mining, we have the expertise to evaluate your needs and develop the drawings for your particular wheels, axles, wheelsets, trucks, gearboxes, gears, pinions and sub-components. We're also able to reverse-engineer parts and components cost-effectively to meet your specifications with good-as-new replacement products that deliver top performance over long periods of time.

A Leader in Wheels & Maintenance Equipment for Transit, Rail & Mining/Industrial Applications

In 1920, Penn Machine Company (PMC) began as a coal company and pioneered the manufacture of quality replacement parts for coal mining equipment. Over the years, the company has grown to become a major supplier of heavy-duty OEM and aftermarket components for transit, railroad, mining, steel, construction, and general industrial applications. Our business is domestic and international in scope. Our capabilities and experience combine to provide a wide range of quality manufactured products and services. Penn Machine is comprised of three market-focused stand-alone business units: Transit, Locomotive, and Industrial/Mining, with operations in Johnstown and Blairsville, PA. Penn Machine Company is part of Marmon Holdings, Inc., a global organization of manufacturers owned by Berkshire Hathaway Inc.
